Dear Dr. Smith:

I am writing to appeal your decision about medical coverage for the PROMETHEUS® Celiac Serology test for my patient, Jane Doe. I am Ms. Doe's gastroenterologist practicing at Sunnyvale Community Hospital in San Diego, CA. I respectfully request that you reconsider your decision based on the medical necessity of this test for the diagnostic evaluation of this patient.

PATIENT INFORMATION

My patient has a history of diarrhea, GI bleeding, and bloating.
(List information relevant to the patient's symptoms, treatment and test results if applicable)

TEST DESCRIPTION

PROMETHEUS Celiac Serology is a comprehensive serum antibody panel. If testing detects positive Anti-gliadin IgA, Anti-Endomysial IgA, and/or Anti-Tissue Transglutaminase IgA markers, celiac disease is likely. If the Anti-gliadin IgG markers are detected and the patient has a Total Serum IgA deficiency, celiac disease is also suspect.

PROMETHEUS Celiac Serology is offered at Prometheus Laboratories Inc., a clinical reference laboratory in San Diego, California. Prometheus is CLIA certified and CAP accredited. All laboratory tests have been validated in accordance with the guidelines established by these and other applicable agencies. Extensive studies have been performed. Currently, Food and Drug Administration (FDA) approval is not required for testing performed by Prometheus.

NETWORK PROVIDER SERVICES

I chose Prometheus to perform PROMETHEUS Celiac Serology serologic testing instead of alternative in-network laboratory testing because Prometheus offers both sensitivity and specificity that can help exclude or confirm celiac disease in potential celiac patients.

>AND/OR<

I ordered the test and directed my patient to an in-network laboratory which does not offer PROMETHEUS™ Celiac Disease Serology. I have made a good-faith attempt to follow insurance guidelines and was unaware of the referral to an out-of-network provider.
